

geoportal

Web-based mapping application and service

"Maximize GIS investment with intimidation-free GIS"

- access GIS data with standard web browser
- easy integration using existing GIS datasets
- customized and "controlled-query" interface
- designed with non-technical users in mind
- easy-to-read cartographic layout and presentation
- complete aesthetic flexibility to match existing web sites
- fast delivery and rollout
- can be confined to a local intranet or shared to the public via the internet
- secure hosting on dedicated *geoportal* server or client's in-house server
